BARTON ROAD INTERCHANGE

START DATE: Summer 2017

COMPLETION: Summer 2019

COST: $92.3 Million

PROJECT OVERVIEW

The Interstate 215 (I-215) Barton Road Interchange project will improve traffic congestion and lengthen the existing bridge to enhance local circulation and access to and from Interstate 215. Located within the City of Grand Terrace, this project also includes improvements to city sidewalks, adding bike lanes on Barton Road and a roundabout west of the bridge at the southbound on- and off-ramps. Some local streets will be reconfigured and improved, including Vivienda Avenue, Michigan Street and Commerce Way. All freeway ramps will be realigned and signals will be upgraded.

PROJECT BENEFITS

The project will improve traffic circulation, increase capacity, provide congestion relief at Barton Road and I-215, and serve as a gateway to the City of Grand Terrace. Barton Road is the only interchange directly serving the City of Grand Terrace. It is currently a two-lane road extending from La Cadena Drive in Colton and continues as Brookside Avenue through Loma Linda and Redlands.

PROJECT FEATURES

1. Widen Barton Road from west of Grand Terrace Road to east of Vivienda Avenue
2. Add a roundabout west of the bridge at the southbound on- and off-ramps
3. Transition Michigan Street into a cul-de-sac and connect Vivienda Avenue to Commerce Way
4. Realign La Crosse Avenue
5. Lengthen the bridge to accommodate future freeway improvements

PROJECT FUNDING

Approximately $92.3 million in federal and local funds have been secured for this project.
